There will be a time set aside for project proponents to give a statement, you can provide a statement then. After that, there will be an opportunity for anyone opposed to speak.

I will see you at 6 pm, Kittitas County Courthouse, 205 W 5th Ave, in the Auditorium. Go through the main entrance, make a left at the security desk, and it is right there on the left of the hall.

Thanks,

Thanks, I will be there. Will anything be expected of me (answering questions, giving a statement), or will I just be a spectator? Never done this before :)

Mr. Mulcahy,

Thank you for the email. I sent out public notice, and I believe that I sent you a notice individually, but I could be wrong. A public record hearing is scheduled for Thursday the 8th of September at the Kittitas County Courthouse at 6pm. Apologies if that is short notice if you would like to be there. I

should have also sent an email in case the snail mail one did not make it.

The hearing will be in front of the Hearing Examiner. I will make a recommendation to him, who will then make a recommendation to the Board of County Commissioners. The Board will make the final decision.

If you have any other questions, please contact me.

Hi Dusty,

I've looked over the documents and I think I've had all my questions answered. In talking with Russell Mau, it seems that our numbers will fall short of what is required for a Group A well. I've also confirmed with WSDOT that our driveway will only need to be rerouted when our expansion constitutes a "change of use", e.g., visitor facilities or intern housing, and not for the early phases of our expansion which will involve improved veterinary and quarantine facilities.

Can you tell me what the next step in this process is?

Thanks for your help
JB

Mr. Pilkington:

My previous comment is still applicable (see attached email); in addition, with the given population numbers meeting a criterion for being a Group A water system, DOH agrees that adding onto this water system would result in the need for a re-classification to a Group A water system. This reclassification requires a Group A application submitted to DOH for review and approval.

So, DOH requires the following:

- A Capacity Analysis, required to be completed by a professional engineer licensed in the State of Washington.
- A Group A water system application.

Thanks,

Mr. Mau,

Below is an email from Kittitas County Public Health. If the system needs to be reclassified, I believe there may be reason for you to change or update your comments. Either way, I wanted to give you a heads up as I write up my report and threshold determination.

The water system (Hart Ranch ID#: AA391M) needs an updated nitrate test done to be up to date on testing.

The numbers of people they indicate will be using the water system are higher than the numbers that are shown on the current WFI form. An update to the current WFI form will need to be done showing the accurate numbers of regular non-residential users. The numbers in the project narrative indicate the system may need to be re-classified to a Group A system in which case they will need to work with DOH on that approval and upgrade prior to the addition of users.

These conditions should be mitigated for.

Subject: Possibly Missing Comments on this one.

Greetings. I am finishing up SEPA review for this project. I do not have any comments on file from Ecology, Fish and Wildlife, or Kittitas Public Health. I would like to give one last chance for comment before proceeding. Thanks all!
