Dusty;
Could you issue a DNS under the option procedure for my signature and the notifications necessary? These are kind of high priority for PW and so I like to issue this, send it to DOE for comment asap so that Huck can make any changes needed. Thanks.

Doc,

Attached are three SEPA checklist's for what we are calling the Dyer, Look, and Bowers sites, I have included a site map showing the locations. These sites will be used for stockpiling of gravel materials and maintenance materials as needed throughout the year. More details are included in the attached.

We are going out for bid for the rock products next week and will be awarding the contract the first part of April. So we are hoping to receive/address any comments that may come in and get these pushed through quickly.

Let me know if you have any questions, Thanks.
