Dusty,

Attached is the proposed site and location of wells, I do not know how to verify that they are not in a wellhead protection zone but the closest well looks to be about 200 to 300 feet away from the site. In response to the vehicles, there will be traffic in and out and parked onsite intermittently, which is equivalent to the use of the surrounding sites.

Thanks,

Luke Huck, P.E.

Mr. Pilkington:

Department of Health Office of Drinking Water has the following comments:

- Is this site within any wellhead protection zones for any public water system?
- Will vehicles be parked on-site as part of the stock-piling of gravel?

DOH appreciates the SEPA Checklist verbiage that states that "Any water (rain water) will be retained on county property and infiltrate", so that any possibly contaminated runoff does not convey off-site that may then enter either wellhead protection zones or surface waters; however, our concern, for which we or a public water system would want to be aware is if there were any fuel, radiator fluid, or other miscellaneous "liquid" leaks or spills that could ultimately infiltrate and then convey via groundwater toward drinking water wells.

I look forward to the permittee's response(s), thanks,
