

KITTITAS COUNTY
Board of County Commissioners

AGENDA STAFF REPORT

AGENDA DATE: October 18, 2016

ACTION REQUESTED: Request Boards signature on the Professional Service Agreement with CH2M for the Kittitas County Transfer Station Relocation Feasibility Study

BACKGROUND: The current Ellensburg transfer station was built in 2001 to service the lower Kittitas County area. Since its construction the services provided at the facility have grown and the need for material diversion has changed. With the current facility we are limited on space which in turn limits the types of services we can provide.

At this time we would like to start the process of looking into the feasibility of relocating the facility to a larger and more accessible site.

Proposals were received from three consulting firms. All three firms were interviewed and it was determined that CH2M would best meet the needs of County.

INTERACTION: Solid Waste, Prosecutors office, and Human Resources Risk Manager.

RECOMMENDATION: Recommend the Boards signature on the Professional Service Agreement.

HANDLING: Return copy to Solid Waste

ATTACHMENTS: Professional Service Agreement

LEAD STAFF: Patti Johnson
