Kittitas County
Information Technology

Agenda Staff Report

AGENDA DATE:
8/7/2012

ACTION REQUESTED:
Sign IVOXY SOW for Network Assessment

BACKGROUND:
Kittitas County's network infrastructure has been developed and modified by many network administrators, each with their own strengths. Best practices may not have been followed and little has been documented. During the on-going data center virtualization project it has become evident that Kittitas County would benefit from a professional network assessment. The assessment would provide best practice guidance in the areas of network infrastructure, availability, performance, security, and management.

No additional funds are requested for this project. Software maintenance included in the 2011 budget will not be purchased and will cover the cost.

INTERACTION:
Prosecutor review the same terms and conditions in the data center virtualization SOW.

RECOMMENDATION:
Sign IVOXY SOW for Network Assessment

HANDLING:
Sign 2 copies and return both to Jim Goeben

LEAD STAFF:
Jim Goeben
