

**ORIGINAL**

## Memo

**Date:** 12/01/2009

**To:** District Courts

**Cc:** Court Clerks, Deputy Prosecutors, Public Disclosure Officers, Etc.

**From:** Steen Nicholson

**RE:** SMD IRLJ 6.6(b) Radar Certification

Pursuant to IRLJ 6.6(b), revised September 1, 2002, the attached document "RADAR CERTIFICATIONS" will be the only certification provided. There will no longer be a separate individual certificate for court or discovery purposes. All necessary information is contained in the affidavit as required by IRLJ 6.6(b), revised September 1, 2002.

I suggest when you are handling discovery requests, under IRLJ 3.1(b), you send the first two pages of the above cited affidavit and the page of exhibit "A" which shows that particular Radar for which certification was requested.

For example:

If the defendant or his attorney requests certification for R478, you would send the first two pages of "RADAR CERTIFICATIONS" and page 7 of 27 in Exhibit "A" which lists R478. R478 can be highlighted for clarity.

If they have any questions you can call or e-mail either the persons listed below:

Steen Nicholson (360) 239-7428 [Steen.Nicholson@wsp.wa.gov](mailto:Steen.Nicholson@wsp.wa.gov)

## CERTIFICATIONS CONCERNING DESIGN AND CONSTRUCTION OF RADAR SPEED MEASURING DEVICES

I, Steen R. Nicholson, do state as follows:

I'm employed with Washington State Patrol in Electronic Service Division as a Speed Measuring Device Expert. I've been employed in such capacity since September 2007 and hold the position of Electronic SMD Engineer. Prior to my promotion to SMD Engineer position I have performed Electronic SMD maintenance and certification for the last six years. Part of my duties include directing the maintenance, and repair of all electronic speed measuring devices (SMD's) used by Washington State Patrol.

The Washington State Patrol currently uses the following Radar SMD's:

1. Falcon
2. Trooper
3. Eagle 95
4. PRO-1000 DS
5. GHS, Genesis I& II
6. Stalker DSR
7. Bee III

A list of the specific SMD Instruments currently in use by this agency is attached here to as Exhibit "A". *Kustom Signals, Inc.*, 1010 W Chestnut, Chanute, Kansas, 66720, manufactures Falcon, Trooper, Eagle 95, and the PRO 1000 DS, Radar SMD'S, D *Electronics, Inc*, 715. Bright Street, Decatur, Illinois, 62522, manufactures GHS, Genesis I & II Radar SMD's, *Applied Concepts, Inc.*, 730 F Ave., Suite 200, Plano, Texas, 75074, manufactures the Stalker DSR Radar SMD, and *MPH Industries, Inc.* 316 E. 9th St, Owensboro, Kentucky, 42303, manufactures Bee III Radar SMD.

- ❖ I have 10 years experience as a technician in the maintenance, repair, modification, and calibration of Pulse Search Radars and 5 years experience as A Quality Assurance Inspector on Pulse Search Radars.
- ❖ I hold and have held since 1999 a General Radiotelephone Operator License.
- ❖ I have completed The Washington State Patrol Speed Measuring Course for Radar at the Washington State Patrol Training Division, Shelton Washington.
- ❖ I have an Associate Arts and Science Degree an Electronic Engineering Technology Degree from Pierce College, Lakewood Washington.
- ❖ I am familiar with the training given to the officers at the WSP Academy and I am personally attended the classes and hold a valid radar operator's certificate. Prior to attending the WSP Academy's radars operator class I studied the NHTSA's "Basic Training Program in Radar Speed Measurement Trainee Manual" DOT HS 807-729 and found the same basic information covered in the and NHTSA's manual is also covered in

the WSP's Academy radar operator's class. In addition, the troopers are taught to perform the internal and external test in accordance with radar manufactures operator's manual. In my opinion the troopers are both by training and field experience should be capable of correctly operating the SMDS listed in the exhibit "A".

Our agency maintains manuals for all of the above stated SMDs. I am personally familiar with these manuals and how each of the SMD's are designed and operated. On the dates indicated on the exhibit "A " copy of which is attached to this declaration and incorporated herein by this reference, testing of SMD's was performed under my direction. The units were evaluated and were found to measure the speed of the vehicle accurately and are on NHTSA's/IACP's Minimum Performance Standards list. Our agency maintains a testing and certification program. This program requires under my direction:

- ❖ That at least once every two years each Radar SMD is tested, certified, and calibrated for accuracy.
- ❖ Testing consists of injecting selected frequencies from a very accurate signal generator into the SMD's to simulate speeds at each 5 or 11-MPH interval from 22 MPH to 120 MPH in the stationary mode. The SMD must read within  $\pm 1$  MPH the correct speed being injected in order to be certified for accuracy.
- ❖ The transmit center frequency for the specified radar unit is verified using appropriate test equipment for  $\pm 100$  MHz's.
- ❖ The tuning fork check is done in the stationary, moving mode (front and rear antenna). Stationary mode  $\pm 1$  MPH Moving mode  $\pm 2$ MPH.
- ❖ A copy of this Radar Affidavit is available from the files of the District Headquarters if the court desires. All SMD's operated by the Washington State Patrol measure the Doppler signals directly by the use of digital techniques.

Based upon my education, training, and experience and my knowledge of the SMD's listed above, it is my opinion that each of these pieces of equipment is so designed and constructed as to accurately employ the Doppler effect in such a manner that it will give accurate measurement of the speed of the motor vehicles when properly calibrated and operated by a trained operator.

**I certify (or declare) under the penalty of perjury under the laws of the state of Washington that the foregoing is true and correct.**
