CAUTION: This email originated from outside the Kittitas County network. Do not click links, open attachments, fulfill requests, or follow guidance unless you recognize the sender and have verified the content is safe.

Hello Chace,

This consultation is in response to CU-23-00006 Honest Cut Meats LLC. This undertaking is for a change over from Washington State inspection to USDA inspection. This requires a small footprint including a 8' by 40' harvest module, a 8' by 20' drip cooler, and a new 1200 gallon septic system and associated drain field.

CCT H/A requests a cultural resource survey prior to implementation and that there be an Inadvertent discovery plan in place prior to implementation, we will also look for DAHP concurrence on this request.

This undertaking is located within the CCT Traditional Territories. We request any undertakings, particularly those involving ground disturbing activities, to have an IDP in place prior to implementation.

The proposed project lies within the Traditional territory of the Moses-Columbia Tribe, 1 of the 12 constituent tribes of the Confederated Tribes of the Colville Reservation (CTCR), which is governed by the Colville Business Council (CBC). The CBC has delegated to the Tribal Historic Preservation Officer (THPO) the responsibility of representing the CTCR with regard to cultural resources management issues throughout the traditional territories of all of the constituent tribes under Resolution 1996-29. This area includes parts of eastern Washington, northeastern Oregon, the Palus territory in Idaho, and south-central British Columbia.

If ground disturbing activities are to be conducted, such as the clearing of land for residential construction, installation of a septic system or the installation of a driveway, creation of a concrete pad, a cultural resource surface survey and sub-surface testing of the area in and directly around the proposed ground disturbance are recommended as a surface observation will not be an accurate assessment of the existent potential for sub-surface cultural deposits. Please do so prior to ground disturbing activities. These tests should be to the terminal depth of the implementation to ensure the totality of the presence or absence of cultural material.

There are no known cultural resources of precontact and historic significance nearby, but this parcel is considered High to Very High Risk for an inadvertent discovery according to the DAHP predictive model.

CCT H/A requests a Cultural Resource Survey and further requests that during implementation there be an Inadvertent Discovery Plan or (IDP) in place to ensure compliance with all Section 106 and relevant cultural resource laws both federally and to the state of Washington.

Sincerely,

Connor Armi | Archaeologist Senior MA, RPA
