Hello Jeremiah,

This consultation is in reference to SP-23-00002 Mills-2. The proposed project falls outside the CTCR's traditional territory. We request any undertakings, particularly those involving ground disturbing activities, to have an IDP in place prior to implementation. This undertaking involves division of plats for the purpose of rural residential development. The Tribal Historic Preservation Officer expects to also see the development plans for these individual parcels throughout their various implementations.

If ground disturbing activities are to be conducted, such as the installation of a septic system or the scraping of a driveway, creation of a concrete pad, a cultural resource surface survey and sub-surface testing of the area in and directly around the proposed ground disturbance are recommended as a surface observation will not be an accurate assessment of the existent potential for sub-surface cultural deposits. Please do so prior to ground disturbing activities. These tests should be to the terminal depth of the implementation to ensure the totality of the presence or absence of cultural material.

There are known cultural resources of historic and pre-contact significance nearby and these particular parcels are considered Low to Moderate Risk for an inadvertent discovery according to the DAHP predictive model. CCT H/A recommends that during implementation there be an inadvertent discovery plan or (IDP) in place to ensure compliance with all Section 106 and relevant cultural resource laws both federally and to the state of Washington.

Thank you for consulting with the Colville Confederated Tribes History and Archaeology Program.

Sincerely,

**Connor Armi** | [Archaeologist Senior MA, RPA](#)
