Hello Mr. Gasawski,

We live at 6590 Umptanum Rd. Just last week we received notice of the application that Mr. Greear has for work on his recently acquired property that is adjacent to our property. From looking at the correspondence that we can view, it looks like a lot of gravel/rock will be excavated from part of his property. We use the road above this work area to get to our home. How do we find out if that mining will affect the integrity of that road? What is the proposal of the amount of trucks, dust and noise that will affect us? If there is construction of a home, will they widen the road before that begins? How does that affect us going up and down the road to our home?

If you are not the person to contact about this, can you direct me to the right person?

Thank you,

Jane Fish
