RE: Comment Letter – BS-15-00001

Dear Ms. Bound,

This letter is to address the comment letter from Gwen Clear regarding a known or suspected contaminated site on Ecology's Confirmed and Suspected Contaminant Sites List, Ecology Facility/Site ID #6084; TCP Cleanup Site ID#43736529.

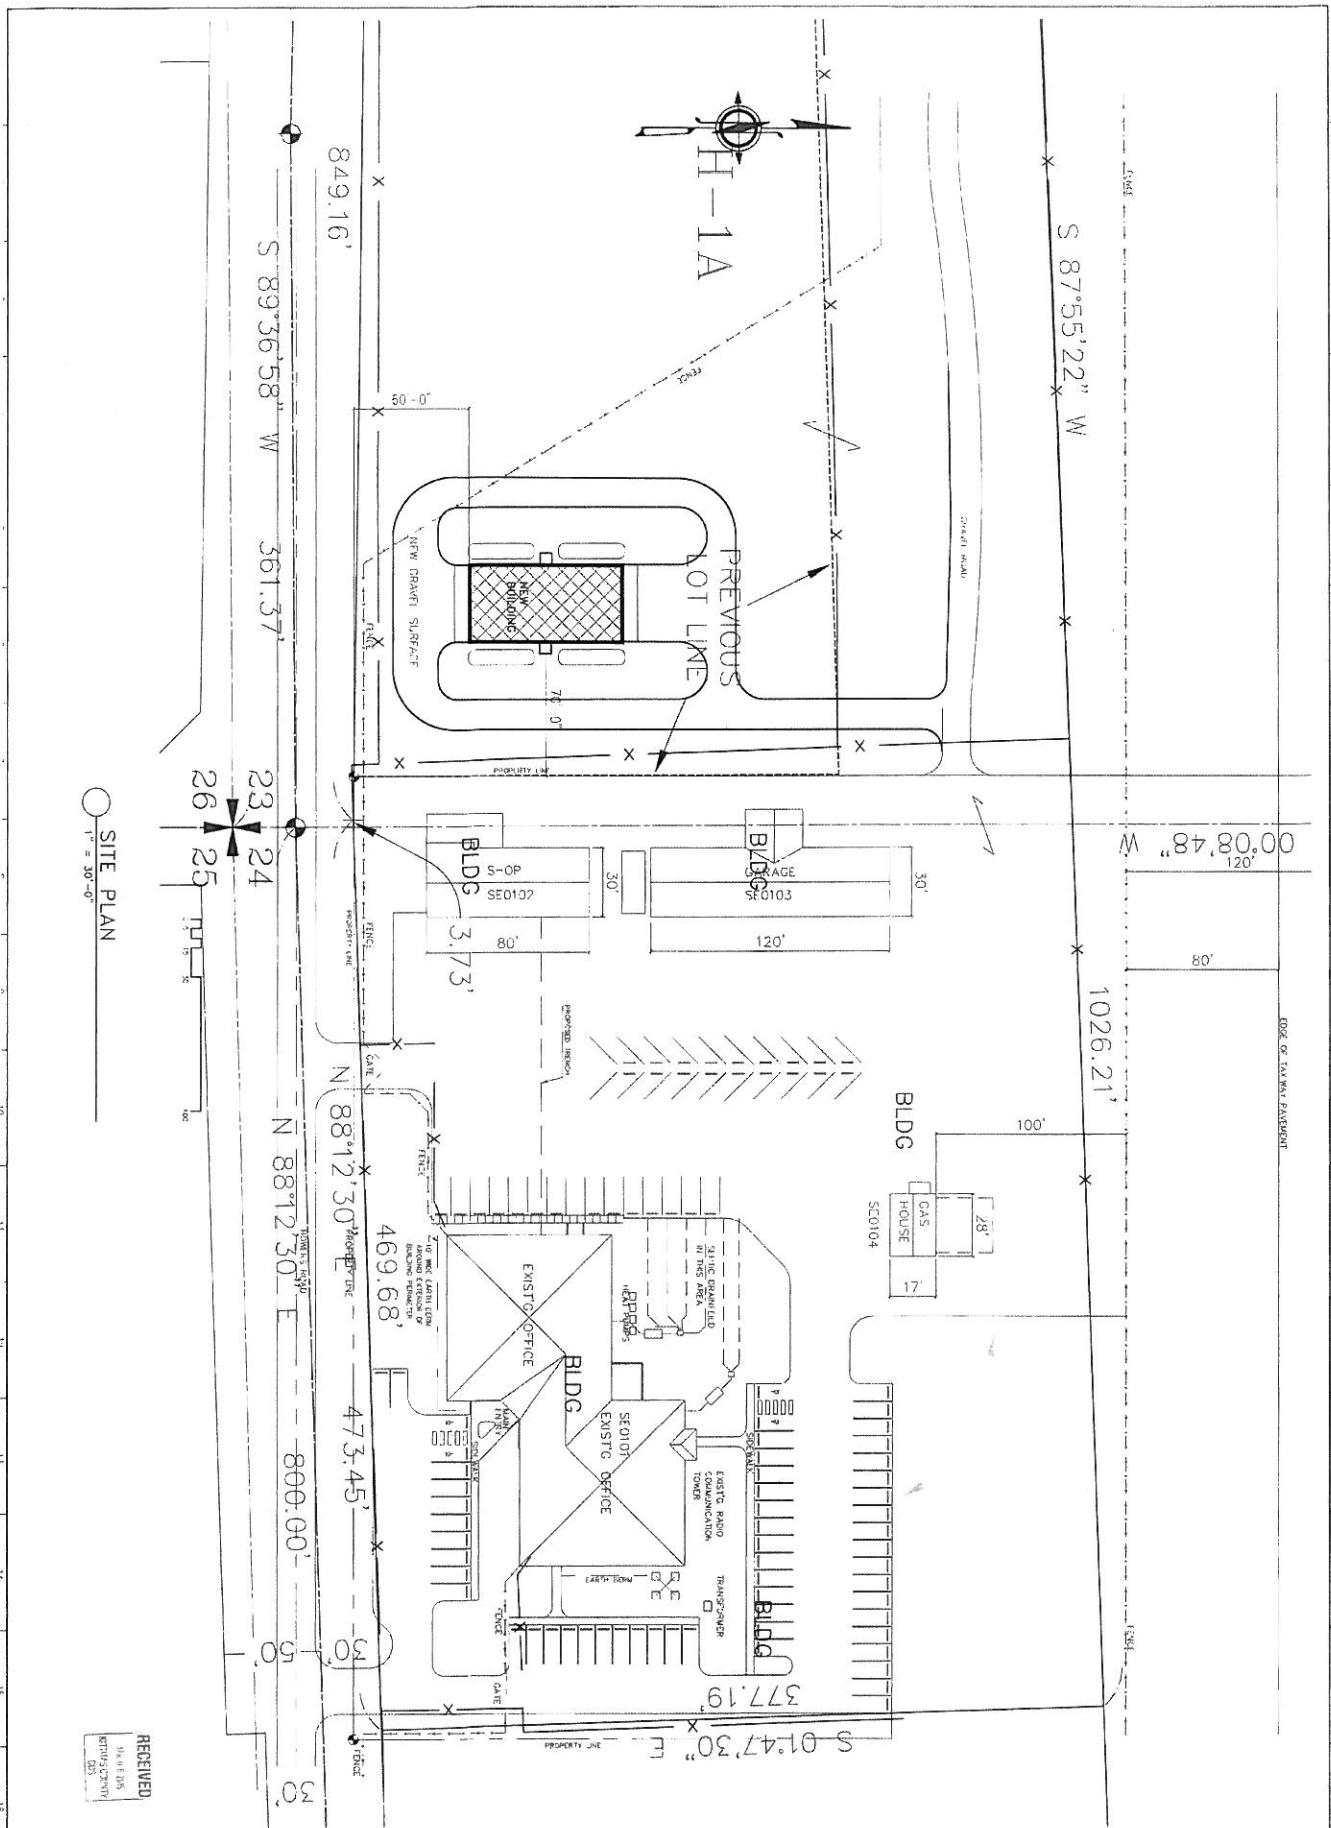

Washington State Department of Natural Resources is currently in the process of securing a building permit from Kittitas County Community Development Services to construct a new building and Kittitas County Department of Public Works is working on a new lease and also a Binding Site Plan Amendment. The site plan amendment is allowing the Department of Natural Resources to lease an additional 5 acres from Kittitas County to construct the new building.

The new building will be constructed on previously undisturbed land within the new lease area. There are no known or suspected contaminants in this area. I have attached a copy of the site map submitted by the Architect hired by the Department of Natural Resources.

If you have further questions, please contact me at 509-962-7699.

Thank you,

Candie Leader
Administrative Assistant
