Dear Mr. Watson:

The Bonneville Power Administration (BPA) has reviewed the above-referenced application and its relationship to the BPA 150-foot wide transmission line easement that this proposed boundary line adjustment impacts. BPA does not have any objection to the boundary line adjustment, but requests having the following statement included as a binding condition on the preliminary approval to help ensure public safety and reliable operation of BPA's facilities.

Portions of this subdivision are encumbered by easements for high-voltage transmission lines owned by the Bonneville Power Administration (BPA). BPA has acquired rights for these easements that limit the landowner's use of this area. BPA has the right of ingress and egress, and the right to keep the easement free and clear of all buildings, sheds, fences, roads, in-ground and above-ground swimming pools, trampolines, or any other type of structure, trees, and all vegetation. All activities planned within the BPA easement need to be reviewed by BPA prior to their occurrence. Do not build, dig, plant, or burn within the easement area without first contacting BPA. BPA information regarding the process for reviewing proposed uses of the easement may be addressed to BPA Real Estate Field Services at the address listed above or by calling (877) 417-9454.

Your cooperation in this matter is greatly appreciated and helps to minimize later disputes or unnecessary strained relationships with the public when incompatible activities must be modified or removed from the easement. If you have any questions regarding this request or need additional information, please feel free to contact Lesli Olson at (509) 358-7437 or toll-free at (877) 417-9454.

Sincerely,

Lesli Olson
