Public Health does not have any issues with this one now that we know how far property line is from well. Thanks.

Sorry for the delay in getting this back into you. Attached is an image with the 5 acre parcel to scale and the location of the well and drain field. The well will be located a little over 100' from the proposed boundary. Please review and contact me back with changes.

Thanks,
Chris Cruse P.L.S.

BL-13-00008 Orr

Chuck or Chris: Can we get a well location and distance to proposed new property line for this one? I've attached a site plan from (I'm guessing) an old septic permit but it is tough to tell for scaling and location and I don't have a precise location for the new line.

Jeff,

We need to get a measurement on the distance the existing well is from the proposed west property line on this one.

Holly

The original home was built prior to septic permitting, and a repair septic permit was issued in 1977. According to our records the septic system lies within the proposed boundaries of the BLA and meets all applicable setbacks.

Holly the well also appears to be within the proposed boundaries but not sure of the distance from the property line, may inquire for further information or do a drive by. Thanks.
