I like the Quilomene project and have no issues with it. It will be interesting to see how it works out. It is very needed in that area.

I have looked at the revised Mitchell drawing and see no problems with the setbacks to the lot lines from both existing wells. This is the first time I have seen the Quilomene PF application and will need additional time to review that as I will be out of the office until next Wednesday.

Greetings. I was wondering if Environmental Health has had the opportunity to look over this Public Facilities permit yet, that is associated with a shorelines substantial development permit. Also, I am wondering if anyone at EH has had a chance to look at the revised site plan for the Mitchell Boundary Line Adjustment. Links to both are below.
