

**Lloyd Carney  
Boundary Line Adjustment**

**Narrative of Project**

The project consists of three existing parcels, approximately 36.7 ac., 3.2 ac. And 2.7 ac. in size, lying between Naneum Creek on the west and Road No. 6 on the east.

There is one existing home, including one well and a septic system, with direct and adjacent access to County Road No. 6. This parcel will be expanded slightly, from 3.2 ac to 4.7± ac. to the west to the left channel of Naneum Creek

The remaining two parcels are currently being farmed, but could potentially have residences. They will become 6.7± ac. and 30.6± ac. They too will be served by wells and septic systems and are adjacent to County Road No. 6.
