

Boundary Lot Line Adjustment Narrative

Please see the attached maps reflecting application requirements. This bla will be adjusting the parcel boundaries of Palomino Fields Division 8 Lot 6 and Parcel # 12586. Palomino Fields Division 8 Lot 6 will be enlarged to fit all necessary Palomino Fields water system infrastructure within a single parcel, including but not limited to wells, water lines, pump house and other associated water infrastructure. Currently the area to be included into Palomino Fields Division 8 Lot 6 contains three wells and their associated setbacks, power, irrigation panel, and a pump house. This infrastructure serves the Palomino Fields Development with domestic and irrigation water.

The reason for this boundary lot line adjustment is to make sure that the complete palomino fields water system is under a single parcel and under the same ownership.
