Tourism & recreation are of major importance to ^{upper} Kittitas County.

Why do people choose to come to our county?

Natural beauty, natural habitat, open spaces, views of mountains, trees, open sky
 - unobstructed vistas -

In short - a respite from manmade environments

Why would ~~we~~ we want to turn this natural beauty that brings us thousands of visitors into a hardscape of energy experiments sure to be white elephants when the subsidies run out?

This is ^{appears to be} all about money - it isn't about "being green" & it certainly has nothing to do with logic or common sense.

Of all the locations in the United States to assemble the largest quantity of solar apparatus the eastern slopes of a Mountain Range in WA state is the polar opposite of logical.

Will this line someones pockets - Absolutely
At the cost of Kittitas Cty Residents
and those that come to visit.

I urge you to use common sense &
conservation

It makes sense to ascertain
through an Environmental Impact Statement
the full impact such an undertaking will
have on all aspects of Kittitas County
the present & the future

5 days
of study

Natural ^{habitats} ~~environments~~ take lifetimes to
replace - net gain to the county 35 jobs

This rush to act on the part
of TSR is about money
Not about responsible stewardship
or partnership.

You are stewards of this county
I charge you to act responsibly.

~~- Storm / Snow pack
+ Snow pack / Snow melt~~
