Subject: Bettas Road

To whom it may concern, I am a property owner just off Bettas Road and was shocked to recently learn that a potential gravel pit is applying for a use permit. I feel it would greatly diminish my property values and quality of life in this beautiful area of the upper Kittitas. The wind farm construction has been hard on our roads. The wind farm itself has changed the terrain and nature of our local. A gravel pit would add additional noise and make it less appealing for riding horses and being in rural country. Water issues have also been difficult for us in our area and it concerns me that a gravel pit would pollute and use an extensive amount of this valuable resource that has been restricted for the general public in our area.

I would be very interested in knowing about any hearings regarding this drastic change to the Bettas Road area.

Thank you, Sally Wagner
