--------------	--

The data above is based on the information presented to CRS. Any change in the facility or facility program that causes the above information to be incorrect is subject to review by CRS. Approval for construction is not approval for licensure. A copy of the facility data certificate will be sent to the licensing agency.

Project Status:

- Permit Issued/ Plan Review Complete -

The construction documents for your project have been reviewed per Chapter 246-359 WAC Temporary Worker Housing Construction Standard and found acceptable. The stamped approved copy of the documents shall be kept available for the licensing staff on site.

For Permitting, please note the following:

- **The Department of Health, Construction Review Services (CRS), is responsible for building construction permitting and occupancy. Prior to starting construction, please submit the appropriate Construction Permit Fee to CRS within one (1) year of the Plan Approval date. Upon receipt of the required Construction Permit Fee, CRS will issue a Construction Permit.**
- **Once the permit is issued, the applicant is responsible for contacting CRS to schedule inspections at least 48 hours prior to the requested inspection date. (For example, if you want to pour a concrete foundation on Saturday, you will need your footings and foundation forms approved by Friday. Therefore, you will need to call by Wednesday to arrange for the inspection.)**
- **Temporary Worker Housing Construction Standard regulations do not allow occupancy of the completed project area until the construction documents have been accepted and a certificate of occupancy has been issued by the Department of Health.**

Upon completion of all of the above, we will close your project file and notify the Migrant Farmworker Housing program that you have completed the review process.

If you have any questions please feel free to contact Construction Review Services at (360) 236-2944.

Please take a few moments and fill out our online survey at www.doh.wa.gov/crs.
