State Environmental Policy Act MITIGATED DETERMINATION OF NONSIGNIFICANCE

- Description:** NMF Enterprises Administrative Conditional Use Permit (CU-14-00001) is a request for an administrative conditional use permit for farming operations related to KCC 17.15.060.1 A – Marijuana processing and production to operate under Washington State Liquor Control Board (WSLCB) I-502 tier 3 production and processing license.
- Proponent:** Michael Graham, authorized agent.
- Location:** The project is located on a 10 acre parcel which is zoned Agriculture 20, located in a portion of Section 16, T18N, R19E, WM, in Kittitas County, Assessor's map number 18-19-16051-0001.
- Lead Agency:** Kittitas County Community Development Services

The lead agency for this proposal has determined that the proposal will not have a probable significant adverse impact on the environment. An Environmental Impact Statement (EIS) is not required under RCW 43.21C.030 (2) (c) and WAC 197-11. This decision was made after review of a SEPA environmental checklist and other information on file with the lead agency, after considering voluntary mitigation measures which the lead agency or the applicant will implement as part of the proposal, and after considering mitigation measures required by existing laws and regulations that will be implemented by the applicant as part of the Kittitas County permit process. The responsible official finds this information reasonably sufficient to evaluate the environmental impact of this proposal. This information is available to the public on request.

The lead agency has determined that certain mitigation measures are necessary in order to issue a Mitigated Determination of Non-Significance (MDNS) for this proposal. Failure to comply with the mitigation measures identified hereafter will result in the issuance of a Determination of Significance (DS) for this project. The mitigation measures include the following:

I. Water

- A. Activities such as road widening, stump pulling and clearing, grading and fill work and utility placements may require a NPDES Construction Stormwater Permit issued by the Department of Ecology prior to start of construction. This permit requires the preparation of a Stormwater Pollution Prevention Plan. It is the applicant's responsibility to contact the Department of Ecology.
- B. Withdrawals of groundwater on the subject property are subject to the rules and regulations adopted and administered by the Washington State Department of Ecology; this includes the use of water for irrigation. Legally obtained water must be used on-site.
- C. There is a water right associated with the property for irrigation and stock water. All wells put to new use will be required to mitigate for Total Water Supply Available (TWSA) at the Parker gauge on the main stem of the Yakima River.

- D. Chapter 173-150 WAC provides for the protection of existing rights against impairment, i.e. interruption or interference in the availability of water. If water supply in an area becomes limited, use could be curtailed by those with senior water rights.
- E. Obtain water from a water budget neutral source and prove such by providing 1) a letter from a purveyor stating that the purveyor has adequate water rights and will provide the necessary water for the applicant's project; 2) an adequate water right for the proposed project; or 3) a certificate of water budget neutrality from the Department of Ecology or other adequate interest in water rights from a water bank.

II. Septic

- A. Adequate septic and waste water facility must be provided on site as permitted by Kittitas County Public Health.

III. Fire & Life Safety

- A. A turn-around shall be provided for fire department access as determined by Kittitas County Fire Marshal.
- B. Any structures that are occupied by employees are required to have an annual fire & life safety inspection and will require a fire & life safety inspection prior to use.
- C. Any structures utilized for I-502 purposes need to meet International Fire Code (IFC) standards.
- D. All development, design and construction shall comply with the International Fire Code requirements.

IV. Light and Aesthetics

- A. All outdoor lighting shall be shielded and directed downward to minimize the effect to nearby residential properties.
- B. Security lighting shall be downward, directed away from adjoining property, and shall be installed with motion sensors.
- C. Provide landscaping plan with 125% bonding or assignment of funds for insuring completion of fence plan and survival of any landscaping necessary to visually screen required fences. Bond will be held for five (5) years to insure the survival of any visual screening vegetation.

V. Noise

- A. Development and construction practices for this project shall only occur between the hours of 7:00 am and 7:00 pm to minimize the effect of construction noise on nearby residential properties.

VI. Building

- A. Any structures used for I-502 production or processing need a change of use occupancy permit.
- B. All new construction must meet the International Building Code requirements.

VII. Roads and Transportation

- A. The driveway must be constructed to commercial standards, as shown in the WSDOT Design Manual Exhibit 1340-2.
- B. An Approved Access permit shall be required from the department of Public Works prior to alteration of the existing access. No new accesses will be allowed.
- C. Contact the Kittitas County Rural Addressing Coordinator at (509) 962-7523 to obtain addresses prior to obtaining a building permit. A parcel cannot receive a building permit or utilities until a parcel is identified with a 911 address.

VIII. Land Use

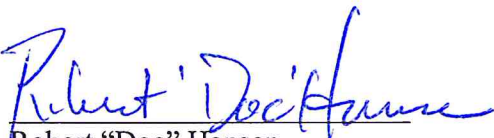

- A. All criteria must meet regulations found in WAC 314.55 and RCW 69.50.

- B. All buildings or planting operations requiring security by law must be setback at least 60 feet from any property boundary.

IX. Historic and Cultural Preservation

- A. Should ground disturbing or other activities related to the proposed conditional use permit result in the inadvertent discovery of cultural or archaeological materials, work shall be stopped in the immediate area and contact be made with the Washington State Department of Archaeology and Historic Preservation (DAHP). Work shall remain suspended until the find is assessed and appropriate consultation is conducted. Should human remains be inadvertently discovered, as dictated by Washington State RCW 27.44.055, work shall be immediately halted in the area and contact made with the coroner and local law enforcement in the most expeditious manner possible.

The above stated mitigation conditions listed above will be provided within conditions of the decision of the conditional use permit approval.

Date: July 31, 2014

This Mitigated DNS is issued under WAC 197-11-355 and WAC 197-11-390; the lead agency will not act on this proposal for 10 working days. Any action to set aside, enjoin, review, or otherwise challenge this administrative SEPA action's procedural compliance with the provisions of Chapter 197-11 WAC shall be commenced on or before 5:00 pm, August 14, 2014.

Pursuant to Chapter 15A.04.020 KCC, this MDNS may be appealed by submitting specific factual objections in writing with a fee of \$500.00 to the Kittitas County Board of Commissioners, Kittitas County Courthouse Room 110, Ellensburg, WA 98926. Timely appeals must be received within 10 working days, or no later than 5:00 PM, August 14, 2014. Aggrieved parties are encouraged to contact the Board at (509) 962-7508 for more information on appeal process.
