Subject: Emerson Road proposal

Dear Kaycee Hathaway,

I would just like to say I feel that commercial agriculture zones are truly the best places for marijuana production. I also believe that it would be unfair to disregard the fact that this business has taken all the right steps to proceed with their venture prior to political changes at a local level. This is a vested business, that has already financially secured their location and all the little things that go along with starting up any new business which is a hardship in itself.

I am writing this letter in support of Tj McDonald to proceed with his business. The conditional use permit for this business should be granted.

I don't see any negative impacts this business has on the environment. I can only see the positive impacts for example a smaller carbon foot print by growing outdoors. Job creation in the county, added tax revenue to the state, and minimizing the black market.

Thank you for your time,
Felicia Johnson
