Follow Up Flag: Follow up
Flag Status: Completed

Both permit apps are attached. Flood permit has a \$180 fee. Grading permit will require engineered plans with all the info from Page 3. Please also provide a copy of the SEPA determination with the application. No grading permit fee at this time. Look them over and let me know if you have any questions. You can apply at any time.

Good morning Chris.

Perfect timing. I am working on the Notice of Public Meeting right now.

Christina Wollman in Public Works is our Floodplain Manager and PW Planner III. Her department handles both the floodplain development permitting and the clearing and grading permitting. I believe you can work on obtaining both of those permits now and they will not hold up our plan to go to hearing on June 11th. Christina, please correct me if I have misstated.

Thanks.

Hi Lindsey,

I believe that we will need a floodplain and a grading permit for the project. I don't know if those have been applied for yet. I know in some counties, the floodplain can be lumped into the shorelines, in that if a shoreline is approved, the floodplain is also approved. If I do need to apply for these separately, can you please point me to the applications and fees so I can get those completed?

Thank you,

Chris Gourley
