KCCDS Attn Jeff Watson

My name is "Gregory De Carr" along with my wife "Edwina" We have lived in The Valley for 21 yrs at the same address "191

Windy Ridge Ln Ellensburg. We are behind the Clerf family farms.

My wife and I drive down Clerf Ave to "81<sup>st</sup>" everyday and enjoy tremendously the views of the Hay growing from start-to-finish. Have you ever seen the Hay when near, time to cut, hay growing in the wind. A beautiful site. I can't, and don't want to see Solar Panels (over 18,000) with an eight foot high fence, topped with Barb wire. Not a pretty site.

Drop by N. Ferguson St next to "Terry Powers" Ranch and will get an idea of what a "Eight Foot High" Enclosure looks like. (This one has a Marijuana grow in it)

This land owned by Bill Hansen is an established well maintained alfalfa and Timothy fields. Beautiful flat land with a creek (which I fish at times). There are Deer, Coyotes, Quail, hawks, Blue Herons on the property, also an established creek with trout Caribou Creek. Why

Would one want to "Screw The Beauty" up

Iron Horse Solar farm will bring more Traffic to this wonderful Area, no matter what you say about "no one being There". Traffic has doubled on Clerk ave with no respect for The speed Limit

What has happened to the "Growth Management Act of Rural Areas? Having "48 acres, 18,000 Panels, 8ft+ high, barbed wire fence in place of 48 acres of Hay mean Growth Management.

I hope to be able to protest This Area before The Determination writing a Letter is not enough.

I know This Area is Changing but hoping it would start at 115 and not This Area.
