Subject: Iron Horse Solar Farm- CU-15-00006

Dear Mr. Jeff Watson;

My wife and I want to go on record as vehemently opposing the Iron Horse Solar Farm.

In addition, we would strongly oppose having any similar type facility being placed on any other ag land other than possibly sagebrush ground.

Any commercial non-farming related use of any farming acreage within this beautiful valley should be off limits.

Whenever the word "farm" is incorporated in the naming of these type of facilities I find it to be misleading and somewhat offensive . Is this done solely for the psychological effect that it may have on the average person to suggest compatibility with existing land use?

Surely there are other options within this county that are better suited for this type of enterprise..... like within our vast sagebrush landscapes.

Thank you.
