We feel that this solar farm should not be allowed on working farm land . This solar Facility will affect our property values of neighboring property owners

This area is zoned for farming ,not a solar facility. This solar facility should be further east out in the sagebrush towards Vantage would be a better site.

No one in this area will benefit from this solar facility ,with reduced energy bills ,or reduced property taxes. We are strongly against it. We have nothing to gain but an ugly

Solar farm to decrease our property value. All our adjoining neighbors feel the same way. Get it out in the sagebrush where there is lots of sun no trees

Mark & Shirley Hahn
