Subject: Iron Horse Solar Farm Comments

I would like to acknowledge that there are areas in this county much better suited for a solar farm. Why are we giving up more and more of prime farm land with water for something that needs neither. Why not in some of the sage, red zones which are usually at a higher elevation and out of the fog for better production. I want to make it known I am opposed to Iron Horse Solar in the current planned location. Robert and Stephanie McKendrick
