Chelsea,

I live and farm in the area where this Event Center is planned. My wife and I object to having this Event Center located in the middle of a farming community. Most of these events at Brightside will take place during late spring and summer when farm equipment is moving from field to field. The impact of the traffic of these parties at the Event Center will deter getting to and from fields. Plus, the loud music is something we don't want in the Fairview area. This land is designated AG 20 and not Event Center 20. If the county won't allow a small ag winery in the Fairview area how can they justify having an Event Center? My advice is to relocate the Event Center in town.

Jim Ridgway
