CAUTION: This email originated from outside the Kittitas County network. Do not click links, open attachments, fulfill requests, or follow guidance unless you recognize the sender and have verified the content is safe.

Thank you, Ms. White. We will forward this to Ed Sewall, our Wetlands Consultant for him to address and assist us in preparing the requested mitigation plan.

Sincerely,

Spencer

<https://ecology.wa.gov/Water-Shorelines/Wetlands/Mitigation/Interagency-guidance>. Part 2 of the two documents on this page.

Specifically, pay to pages 111-124, planting plan and monitoring.

I hope this helps

Good Afternoon Spencer,

I am in the field today and tomorrow and have limited access. I recommend consulting with Kelly. The County regulates the upland buffer surrounding the wetland.

Revegetation should occur in any of the areas where the wetland buffer was cleared and graded.

I can provide more specific information on Thursday when I return to the office if Kelly needs it.

Thanks

Lori White

Ms. White:

Please let us know when you've had a chance to review what mitigation steps you would like us to perform, consistent with my email from last week. As a reminder, we are proposing removal of the primitive camp site we have on our property and which is located within a boundary from the wetland (not actually within the wetland). We are proposing to remove the fire pit and rocks and replant the entire boundary area with native vegetation to a distance of not less than 50 feet. We would do so at any revegetation density requested by Ecology. Before we submit our formal written mitigation plan, we want to know if this effort will meet your standards and the scope of what you are requesting.

Thank you.

Spencer, I was on a site with Lori White from DOE last week and talked to her about this. Her first issue was wondering why the flagging dirt go further west and I believe I just stopped where the property line was so that's not really an issue. I will need to look at the site again to see where she's talking about as far as any revegetation.

Ed
