Hello Alex,

I believe this is the access connection permit you are looking for. When we issued the Permit with BLM it included the two Swauk Ranch parcels immediately adjacent to BLM's parcel for the normal operation of a farm contingent on a BLM crossing agreement and or easement. This Permit also provides access for contiguous parcels under the same ownership, in additions it was to provide access for the construction and maintenance Swauk Wind Farm.

If you have any additional questions or need further assistance please feel free to call or write.

Sincerely

Mark Kaiser

Mark, the access issue came up recently when we were talking with Kittitas County regarding the permitting of another structure on the property. We are also in the planning stages of other projects that include other renewable energy.

The access point in question is the access for 25 parcels of property that make up Swauk Ranch and Swauk Wind farm. The access off Hwy has been in use for over 70 years in that location. When we discussed the Wind farm in 2012 it was noted at that time the use(s) for the access point. It was agreed at that time the location was the safest point and that improvement was the best solution for the equipment deliveries.

Please call back at your convenience. I was not able to hear all you message due to bad connection.

Thank you
Alex Cordas
