RE: Palomino Fields Division 5 Final Plat

Public Works has reviewed the final plat application supporting Palomino Fields Division 5. My comments appear below for your consideration.

1. Roan Drive has been built to a public road standard and has been accepted by Public Works inspection staff. A temporary turn-around meeting current County Road Standards is required at the end of Roan Drive prior to placing the roadway onto the County Road network.
2. Stormwater facilities supporting Roan Drive have been built pursuant to the approved stormwater plan and are accepted by Public Works.
