Much of the area to be developed is in the conservation easement that Suncadia advertises and is so proud of. I understand that they were able to back out of that obligation but making it legal doesn't make it right for our county or local residents. Part of Suncadia's original plan acceptance was predicated on them having that conservation easement. Please respond to this email so that we citizens can maintain some faith in our county government. Thank you,
Larry Hobbs
