Sounds like Karen says let it go forward and so will I.

Hi Rose,

I am going to insert the typical floodway comments on this one.

A portion of this property is located within the floodway. The floodway is highly restricted and any development must demonstrate no rise in the level of the 100-year flood before being permitted. No new or substantially improved residences are allowed within the floodway.

I looked over the fence construction plans and feel that they have made a good effort to ensure that there will be no impacts to the floodway as a result of this fence because of the removable panels.

Let me know if you need anything else.

Karen Hodges

Hi Karen,

If you could look this over [\[Holzer Shoreline Exemption\]](#) I would appreciate it. Mr. Holzer wants to repair his fence which is in the floodway, which typically isn't allowed. I was able to find a flood permit for repair work on the bridge, allowing it under the condition that a flood engineer determines that the work does not change or impact the floodway.

If that is your opinion as well, I can move forward. I have been in discussion with DFW as well regarding this. Thank you,

Rose Shriner
