### NOTICE OF DECISION

**RECEIVED**  
JUN 07 2018

Kittitas County CDS

Kittitas County CDS

**To:** Applicant  
Interested Parties (KCC 15A.06)

**From:** Jeremy Johnston, Staff Planner

**Date:** May 25, 2018

**Subject:** Morris Zoning Setback Variance (VA-18-00001)

Pursuant to RCW 36.70B.130 and KCC 15A.06, notice is hereby given that Kittitas County Community Development Services approves the Zoning Setback Variance for Mr. Morris, landowner, to reduce a front yard setback of 25 feet to 2 feet. The site is located off of Summer Park Ct. in Section 17, T 21 N, R13 E, WM parcel 546835. Assessor map number 21-13-17051-0028.

An appeal of this land use decision may be filed within 10 working days by submitting specific factual objections and a fee of \$1570 to the Kittitas County Board of Commissioners at 205 West 5<sup>th</sup>, #108 Ellensburg, WA 98926. The appeal and deadline is 5:00pm June 11, 2018.

The original application and related information may be examined during business hours at Kittitas County Community Development Services, 411 N. Ruby Suite 2, Ellensburg, WA 98926 or on the CDS website at <http://www.co.kittitas.wa.us/cds/land-usc/default.aspx>

If you have questions or need assistance please contact Community Development Services at (509) 962-7065; email at [jeremy.johnston@co.kittitas.wa.us](mailto:jeremy.johnston@co.kittitas.wa.us) Staff Planner: Jeremy Johnston.

*require the garage to be 59 feet from the edge of the pavement and make the driveway slope to the garage entrance greater than 45 percent and not usable during winter months. It would also mean construction would fall within the 115 foot shoreline setback, and create a long driveway requiring fill and retaining walls.”*

Staff Conclusions:

51 Summer Park Ct. is a parcel located on a private cul-de-sac off of Via Kachess Rd. A site visit indicated the extreme slope of the parcel exceeds that of many neighboring parcels and may present a danger in winter months in vehicle access to the residence. In addition, without the proposed setback back reduction, the building of a garage would have to take place within the 115 foot shoreline buffer/setback zone requiring a Shoreline Variance and potentially adversely impacting the shoreline environment.

- b. Such variance is necessary for the preservation and enjoyment of a substantial property right of the applicant possessed by owners of other properties in the same vicinity.

Applicant Response:

*“The parcel, platted in 1976, currently has a residence constructed in 1993 as a vacation home without a garage. In order for the property to support full-time residency year round access to the garage and parking is desired. During winter months the garage needs to be close to the top of the slope as shown on the attached plot plan. This would provide a slope of 15 degrees and a short driveway to the garage entrance. During winter months, November through March, because of snow conditions parking is currently only available within the street right-of-way along the top slope. Parcels along Via Kachess road and other road right-of-ways within Kachess community have received variances to the front yard setback requirements with no adverse visual or public safety affect.”*

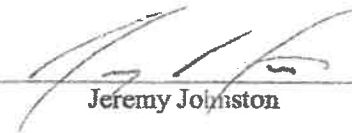

Staff Conclusions:

The applicant desires year around access to the residence at 51 Summer Park Ct.. Several neighbors in the vicinity with less hazardous slopes possess street level garages allowing them safe vehicle parking access to their properties.

- c. Authorization of such variance will not be materially detrimental to the public welfare or injurious to property in the vicinity.

Applicant Response:

*“I do not believe that granting this variance from the setback code will be detrimental to the public welfare or be at all injurious to the property owners in the same vicinity. The variance would not affect the use of the street as Summer Park Ct. is a short private street with a 60 foot offset cul-de-sac and the proposed construction would be 36 feet from the edge of the pavement and 16 feet downhill from the top of slope. The variance would have no adverse effect or be injurious to adjacent property as it would provide off street covered parking year around. The Kachess II plat is located in mountainous terrain and not all lots can comply with the desired setbacks. The Comprehensive Plan acknowledges site conditions vary and provide for variances. The granting of the variance will enable us to further enjoy our investment as well as meet the goals of the Comprehensive Plan and the Kachess Community covenants.”*

**Special Flood Hazard Area (SFHA)** - The SFHA is an area that would be inundated by the flood having a 1-percent chance of being equaled or exceeded in any given year (base flood).

**ADDITIONAL CONSIDERATIONS** (Please refer to the appropriate section on Attachment 1 for the additional considerations listed below.)

ZONE A

This document provides the Federal Emergency Management Agency's determination regarding a request for a Letter of Map Amendment for the property described above. Using the information submitted and the effective National Flood Insurance Program (NFIP) map, we have determined that the property(ies) is/are not located in the SFHA, an area inundated by the flood having a 1-percent chance of being equaled or exceeded in any given year (base flood). This document amends the effective NFIP map to remove the subject property from the SFHA located on the effective NFIP map; therefore, the Federal mandatory flood insurance requirement does not apply. However, the lender has the option to continue the flood insurance requirement to protect its financial risk on the loan. A Preferred Risk Policy (PRP) is available for buildings located outside the SFHA. Information about the PRP and how one can apply is enclosed.

This determination is based on the flood data presently available. The enclosed documents provide additional information regarding this determination. If you have any questions about this document, please contact the FEMA Map Information eXchange (FMIX) toll free at (877) 336-2627 (877-FEMA MAP) or by letter addressed to the Federal Emergency Management Agency, Engineering Library, 3601 Eisenhower Ave Ste 500, Alexandria, VA 22304-6426.
