The project will create no new shoreline or wetland impacts and is maintenance repair to existing facilities. The repair will improve the current hydraulic opening and will increase flood clearance of the main span assuring zero backwater rise of the repaired system. The repair creates no new impervious surfaces and re-installs approximately 750SF of salvaged deck surface.

21. Provide any additional information needed to verify the project's impacts to shoreline ecological functions: (attach additional sheets and relevant reports as necessary)

The shoreline foot print and impacts are unchanged with no expansions or changes in use beyond that previously existing.
