

10/3/2022

Dear Jeremiah Cromie,

In regards to the JARPA or HPA forms and SEPA checklist.

I am working with Scott Downes of DFW on this project. I am to apply for the HPA once I have something from the county. I am asking for an emergency waiver in order to start work this fall. After which we will follow through next year with the formal HPA and engineer.

We are applying for these

Wac 197-11-880 SEPA emergency exemption

KCC 17B.07.030 (2)(d)

We are also requesting a SEPA emergency exemption/waiver at this time to do work this fall and then to follow through next year with an engineer.

I hope you will conclude from our drawings and photographs that it is in everyone's best interest to start the work this fall to prevent any further erosion and property damage when the water rises in November. After which we have an engineer on retainer to draw up a plan in the spring once the area has been reassessed. Please, let us know if there is anything we should change or do to help make this project successful for everyone.

Best,

Jody Joldersma and Matthew Jenkins
