Joe,

We still have not received an updated site plan with the deck and dimensions of the deck. This will need to be submitted for review so that the County can issue the Shoreline Exemption permit. Thanks.

Good morning all,
Just a quick update: Stairs are removed, concrete has been jackhammered out.
We will proceed with the cut down, new stairs and railings asap.

Thanks!

Good morning!

Just a quick update: Stairs are being removed today, hoping to start cement removal tomorrow, just depending on equipment and the pending storm.

Happy to do so!
I dropped off paperwork this morning, and just got back from visiting the site.

Is there a time Thursday or Friday that will work for you?

All,
Here is a digital copy of the requested documents for Kirks project. These will be submitted to Ellensburg office tomorrow morning. Was hoping to be even faster, but the Letter of Hire took a little more time than we had hoped.

We were out to the site over the weekend, and it is still covered in ice/snow, even with the amount of melt we had last week. More snow expected this weekend.

Please do let me know if there is anything else at all needed, as we want to make absolutely sure that we are in compliance and Kirks get the extension needed to make the appropriate changes.

Thanks,

Joe Mehlhoff

Subject: FW: CE 542 Teanaway Acres, parcel 075235

Hi Lisa,

Thank you for calling me yesterday to discuss the permitting requirements for your deck. I met with Joe (509 Facilities) and Dane (Foreman) today and advised the following are required to be submitted by **February 15, 2023**:

1. Scaled site plan to process the shoreline and the flood development permits. The scaled site plan must have the ordinary high-water mark and floodway boundary marked. Two copies are required, one for CDS Planners for the shoreline application and one for Public Works Water Resources for the flood development permit.
2. Preliminary Site Analysis application completed and submitted to CDS for the deck replacement. This has a 7-10 day review time and once completed, the results are provided to the applicant. The Preliminary Site Analysis is *required before development and construction in the county* and provides critical area, flood, shoreline, public health, setback, building, fire, etc. requirements and regulations so there's awareness prior to building. This was not completed and unpermitted construction occurred in the floodplain and shoreline which created three violations at your parcel. **509 Facilities must understand this for future projects.**
3. Letter-of-hire from an architect/engineer licensed in the state of Washington stating they've been hired to draw up plans for this deck and it needs to have a reasonable estimated date the plans will be completed.

Only if these requirements are met will I approve an extension on enforcement and the removal of the sidewalk for better weather

conditions. I advised that a building permit is required for the deck and that once the stamped engineered plans are completed they/you must follow through with that process until a final passing inspection has been completed for the deck. If the above requirements are met by **February 15, 2023**, and an extension is granted, the sidewalk will be removed at the first opportunity that weather allows. **Please note, I will be checking the area soon and if there is no snow/ice impacting removal, then an extension is not warranted for the sidewalk and it must be removed now.**

In addition, the deck may not be expanded without a shoreline variance application and approval. This is an expensive permit and the probability of approval is very low. This means you're limited to the original form of the deck and the stairs spanning the length of the deck must be removed. I'll also need you to complete and submit the extension request (attached) by **February 15, 2023**. For the request, you'll need to have the engineer/architect's estimated date the stamped plans will be ready and it must be a reasonable timeframe or it won't be approved. Please let me know if you have any questions.

Hello Lisa,

I hope you're doing well today. This email is my last attempt to gain voluntary compliance for the violations at your parcel (see email below which I sent you in November). Our office staff have

attempted to work with you and your contractors to complete these requirements since August when the unpermitted deck replacement and sidewalk were first observed. If our planning staff does not receive the required documentation to progress the shoreline permit and Public Works does not receive the required documentation to progress the flood permit, and you do not begin the building permit process within the next two weeks (**by February 15, 2023**), then enforcement will proceed. These are per-day violations for each violation at \$1025.00 each/per day. You can reach our planners and Permit Technicians at (509) 962-7506 and Public Works at (509) 962-7523.

Subject: CE 542 Teanaway Acres, parcel 075235

Hi Lisa,

Thank you for talking with me today about your unpermitted deck and cement sidewalk at your parcel which are within the floodplain and shoreline. Two permits are listed as pending in our system: SX-22-00022, the Shoreline Exemption Permit, and FP-22-00008 for the Flood Development Permit. As we discussed, the shoreline permit still needs to have a scaled site plan submitted in order to process it. You can draft this yourself or have someone draft it for you. The flood development permit will require a final inspection, so be sure to schedule that with Public Works (509) 962-7523 once it has been issued. A building permit is required for the deck if any of the following conditions are met:

1. The area of the deck exceeds 200 square feet.
2. The walking surface of the deck is over 30" above grade at any point.
3. The deck is attached to the structure.

If a building permit is required, you'll need to submit the following to our office to permit the structure:

1. Two scaled copies of stamped engineered plans.
2. Two copies of the Preliminary Site Analysis report.
3. Completed building permit application.
4. Scaled site plan.
5. Permit deposit.

If the deck is a repair/replacement of an existing deck and the original footprint is being used, then a Preliminary Site Analysis (PSA) might not be required. Timing of deck removal and replacement will probably determine whether the PSA is required. This is a question best answered by Steph Mifflin. If a PSA is required, then I've attached that form to this email to assist. As discussed, the cement sidewalk can't be permitted and must be removed as soon as possible. To place the code case on hold, you'll need to hire the engineer/architect to draw up the stamped plans and provide me with a letter-of-hire or email stating they've been hired by you for this project and it needs to include a reasonable date the plans are expected to be completed and ready for submittal. That should get us started. Let me know if you have any other questions and have a great evening.

Regards,

Toni Berkshire, CCEO
