1. The existing cabin will be lifted and will have a new foundation will be built under it. This will raise the top of the structure's floor trusses to the mandated design flood elevation of 2053.6, approximately 6' above the highest adjacent grade.

The existing Cabin has a 10'x19' deck and exit stair on the west side of the structure encroaching into the FEMA floodway boundary. A 6x15 deck + existing stairs have been relocated to the south side of the structure and out of the floodway boundary.
