SEPA MITIGATED DETERMINATION OF NONSIGNIFICANCE

- Project:** Mt. Baldy Short Plat (SP-08-00022)
- Description:** A 4-lot Short Plat on approximately 4.39 acres of land zoned Rural Residential (Suburban).
- Proponent:** MDJ Development
PO Box 1117
Ellensburg, WA 98926
- Chris Cruse, Cruse & Associates (Authorized Agent)
PO Box 959
Ellensburg, WA 98926
- Location:** The subject property is located east of the City of Ellensburg, west of Number 6 Road, south of Quartz Mountain Drive on Mt. Baldy Lane, Ellensburg, WA 98926, and is located in a portion of Section 06, T17N, R19E, WM, in Kittitas County. Assessor's map number 17-19-06094-0009.
- Lead Agency:** Kittitas County Community Development Services

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21C.030(2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request. The lead agency for this proposal has also determined that certain mitigation measures are necessary in order to issue a Determination of Non-Significance for this proposal. Failure to comply with the mitigation measures identified hereafter will result in the issuance of a Determination of Significance (DS) for this project. These mitigation measures include the following:

I. Transportation

- A. The applicant shall be responsible for meeting all conditions and requirements in place at the time of development set forth by the Department of Public Works. See attached memorandum.
- B. If structures are located more than 150' from the road, adequate access and turnaround will need to be provided in compliance with IFC 2006 – Appendix D.
- C. Addresses posted for all new residences shall be clearly visible from both directions at the County road.
- D. The applicant shall provide a safe location and passageway for a school bus stop. The local school district shall be consulted regarding the location and proof of consultation shall be provided to Community Development Services prior to final approval.
- E. Mail routes and/or boxes shall be approved by the local postmaster. Mailbox locations shall not create sight obstructions.

II. Water

- A. Withdrawals of groundwater on the subject property are subject to the rules and regulations adopted and administered by the Washington State Department of Ecology; this includes the use of water for irrigation. Legally obtained water must be used on-site.

- B. The applicant shall connect to the existing Turf Trails Water Company water system and provide written approval from the Washington State Department of Health for modifying the current public water system from 9 connections to 12 prior to final plat approval. Applicant shall meet all local and state requirements pertaining to water use.
- C. Washington Administrative Code (WAC) 173-150 provides for the protection of existing rights against impairment, i.e. interruption or interference in the availability of water. If the water supply in your area becomes limited your use could be curtailed by those with senior water rights.
- D. Erosion control measures shall be in place prior to any clearing, grading or construction. These control measures must be able to prevent soil from being carried into surface water (this includes storm drains) by storm runoff. A storm water construction permit may be required if there is a potential for discharge from a construction site larger than one acre. A Storm Water Pollution Prevention Plan (Erosion Sediment Control Plan) is needed for all permitted construction sites.
- E. Location of the existing irrigation ditches shall be shown on the final mylars. An easement for maintenance of the existing ditch and or ditches shall be recorded prior to final plat approval. Irrigation water rights of downstream users will need to be taken into effect.

III. Light and Aesthetics

- A. All outdoor lighting shall be shielded and directed downward to minimize the effect to nearby residential properties.

IV. Noise

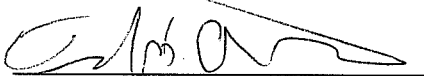

- A. Construction activities shall comply with KCC 9.45 (Noise). Development and construction practices for this project shall only occur between the hours of 7:00 am to 7:00 pm to minimize the effect of construction noise.

V. SEPA Review

- A. The Mt. Baldy Short Plat (SP-08-00022) is part of the Turf Trails Plat (P-06-30) and as such shall comply with all mitigations and conditions thereof.

This MDNS is issued under WAC 197-11-350. The lead agency will not act on this proposal for 15 days. Any action to set aside, enjoin, review, or otherwise challenge this administrative SEPA action's procedural compliance with the provisions of Chapter 197-11 WAC shall be commenced within 10 working days (on or before 5:00 pm, Wednesday, November 12, 2008).

Dear Ms. Pettit:

Thank you for the opportunity to comment during the optional determination of nonsignificance process for the Mount Baldy short plat of approximately 4.39 acres into 4 lots, proposed by MDJ Development [SP 08-022]. We have reviewed the documents and have the following comments.

Water Resources

The water purveyor is responsible for ensuring that the proposed use(s) are within the limitations of its water rights. If the proposal's actions are different than the existing water right (source, purpose, the place of use, or period of use), then it is subject to approval from the Department of Ecology pursuant to Sections 90.03.380 RCW and 90.44.100 RCW.

If you have any questions concerning the Water Resources comments, please contact Breean Zimmerman at (509) 454-7647.

Water Quality

Dividing or platting of a piece of property is often the first step in a proposed development. If a subsequent individual or common plan of development exceeds 1 acre of disturbed ground in size an NPDES Construction Stormwater Permit may be required. Ground disturbance includes all utility placements and building or upgrading existing roads. The process requires going through SEPA, developing a stormwater pollution prevention plan, submitting an application and a 30 day public notice process. This may take 45-60 days. A permit and a stormwater plan are required prior to beginning ground-breaking activities. Please contact Bryan Neet with the Department of Ecology, (509)

Ms. Pettit

Dear Trudie:

Thank you for the opportunity to comment on the Mt. Baldy Short Plat, No. SP-08-22. In order to meet the requirements set forth by Kittitas County Public Health's Environmental Health Division and Kittitas County Code Chapter 13, the following items must be submitted:

- Soil logs for each lot where installation of a septic system is intended;
- Proof of connection approval for the Turf Trails Water Company. Include written approval from the Washington State Department of Health for modifying the current public water system from 9 connections to 12.
- *The following plat notes shall be included on the final mylar:*
 1. "The approval of this division of land includes no guarantee that there is a legal right to withdraw groundwater within the land division. The approval of this division of land provides no guarantee that use of water under the ground water exemption (RCW 90.44.050) for this plat or any portion thereof will not be subject to curtailment by the Department of Ecology or a court of law."

I look forward to assisting you if you have further questions or concerns.

Sincerely,

Holly Myers, Environmental Health Director

To Whom It May Concern:

We are currently the landowners of Lot 8 on Quartz Mountain Drive. Our property would be affected by Lot 9D 's plans. We strongly feel that this plan is unacceptable. When we purchased lot 8 we were told by Mike Jackson, MDJ owner, that Lot 9 was approximately 4.39 acres of land that would not be able to be split for future development. Therefore, only one home would be able to be built on this property.

We have now built our home on Lot 8 and are very upset to know that there is a possibility that our backyard will be aligned with Lot 9D's driveway/road. Thinking that our two little boys would be safe to play and run in our 1-acre backyard, we purchased this lot. Had we known that their safety would be questioned by a driveway/road with passing cars along side our backyard we would not have purchased it.

We ask that you reconsider the property lines for your future proposed plan of Lot 9. Perhaps make Lot 9D in the corner (at an angle) like the other home on the cul-de-sac on Quartz Mountain Drive. If this is not an option, perhaps supplying us with a fence along the driveway/street would be an option.

Thank you for your consideration on this matter. Please let me know if we need to take further action, attend a meeting or write another letter. Thank you again.

Trudie:

I have reviewed the Short Plat application by MDJ for the MT Baldy Short Plat (SP-08-00022). Kittitas Valley Fire and Rescue reviews proposed development and offers suggestions for the developer and authority that has jurisdiction, Kittitas County. KVFR has no code enforcement authority so these are recommendations only. During development, the following items may need to be addressed with the developer:

1. If the structure(s) are located more than 150' from the road, adequate access and turnaround will need to be provided in compliance with IIFC 2006 – Appendix D
2. The address for each property will need to be visible from both direction of travel.

Thank you for your time and consideration in these matters.

Sincerely,

A handwritten signature in black ink, appearing to read "Rich Elliott".

MEMORANDUM

TO: Trudie Pettit, Community Development Services
FROM: Christina Wollman, Planner II *CW*
DATE: July 31, 2008
SUBJECT: Mt. Baldy Short Plat SP-08-22

Our department has reviewed the short plat application and has the following comments:

“Conditional Preliminary Approval” is recommended based on the information provided. See below for conditions of preliminary approval.

“Additional Information Requested”. Prior to continuing the approval process for the submitted development, additional information is requested for analysis.

The following shall be conditions of preliminary approval:

1. **Road Improvements:** The applicant has bonded for improvements to Quartz Mtn. Drive and Mt. Baldy Lane and plans for the roads to become county on-system roads. Until such time the roads are maintained by the County, the road improvement conditions of the Turf Trails Plat shall apply to this short plat.
2. **Cohoe Road:** The portion of Cohoe Road west of the cul-de-sac has been vacated and shall be reflected on the final plat.
3. **Private Road Maintenance Agreement:** The applicant shall meet all applicable conditions of any pre-established or required Private Road Maintenance Agreements.
4. **Lot Closure:** It is the responsibility of the Professional Licensed Surveyor (PLS) to ensure the lot closures are correct and accurate.
5. **Access Permit:** An approved access permit shall be required from the Department of Public Works prior to creating any new driveway access or performing work within the county road right of way.
6. **Addressing:** Contact the Kittitas County Rural Addressing Coordinator at (509) 962-7523 to obtain addresses prior to obtaining a building permit. A parcel cannot receive a building permit or utilities until such parcel is identified with a 911 address.

7. Fire Protection: Contact the Kittitas County Fire Marshal regarding any additional access requirements for Emergency Response.
8. Mailbox Placement: Mailboxes must be approved by U.S. Postal Service. Mailbox locations are site specific. Contact your local Post Office for location and design standards before beginning construction.

Current Kittitas County Road Standards, as adopted 9/6/05.

Chapter 12 – PRIVATE ROADS

12.12.010 General

Private roads shall meet the following conditions:

1. Private roads shall meet the minimum access requirements of the International Fire Code as adopted by the County, and
2. Shall be designed and constructed in conformance with AASHTO Guidelines for Geometric Design of Very Low-Volume Local Roads (ADT < 400) 2001, as now exists or hereafter amended, and
3. Shall be inspected and certified by a licensed professional engineer for conformance with the above referenced standards. In the alternative, an applicant may request the private roadway to be inspected and subject to the approval of the Public Works Director. If certification by the public Works Director/County Engineer is desired, submission of road plans and necessary testing documentation that confirms compliance with Kittitas County Road Standards is required, and services will be performed on a reimbursable basis, and
4. Permanently established by an easement recorded with the Kittitas County Auditor or right-of-way, providing legal access to each affected lot, dwelling unit, or business, and
5. Will not result in land locking of existing or proposed parcels, and
6. Maintained by the developer or legally responsible owner or homeowners' association or other legal entity made up of all benefited property owners, under the provisions of an acceptable and recorded "Private Road Maintenance Agreement", and
7. Clearly described on the face of the plat, short plat, or other development authorization and clearly signed at street location as a private street or road, for the maintenance of which Kittitas County is not responsible and a disclosure statement of the same is filed with the County Auditor, and
8. The following note shall be placed on the face of the plat, short plat, or other development authorization:

"Kittitas County will not accept private roads for maintenance as public streets or roads until such streets or roads are brought into conformance with current

County Road Standards. This requirement will include the hard surface paving of any street or road surfaced originally with gravel."

Please let me know if you have any questions or need further information.

KITITAS COUNTY DEPARTMENT OF PUBLIC WORKS

MEMORANDUM

TO: Scott Turnbull, Staff Planner, Community Development Services

FROM: Randy Carbary, Development Review, Planner II *RC*

DATE: November 28, 2006

SUBJECT: Turf Trails Plat

Our department has reviewed the Short Plat application and has the following comments:

"Preliminary Approval" has been granted, based on the information provided.

"Conditional Preliminary Approval" has been granted, based on the information provided, see below for conditions of preliminary approval:

"Preliminary Approval" has not been granted. Our department requests additional information is submitted/ obtained for further review. See below for requested information.

Prior to Final Plat Approval:

1. Road Name(s) "Fenz Lane": Road names shall be subject to the approval of the Kittitas County Department of Public Works. Contact the Kittitas County Rural Addressing Coordinator at (509) 962-7523 for more information.
2. Newly Proposed Road(s): The newly proposed road(s) appear to be extensions of Delta Street and Quartz Mtn. Drive, as depicted by the 60' right of way, this would appear to indicate that this is being proposed as a county "on-system" road, similar to the Grasslands Park Plat extension of Quartz Mtn Drive. Delta Street and Quartz Mtn. Drive are designated as Class 09 Rural Local Access Roads per Kittitas County Road Standards 12.03.030, C. This would be consistent with previous development actions and with current policy (KCC 16.12.080). The applicant and/or designated representative shall contact the Kittitas County Department of Public Works to discuss the newly proposed road at their earliest convenience.

Page 1 of 6

3. Internal Roads: The newly proposed road shall be constructed as defined in Kittitas County Road Standards 12.03.010 Road Classifications and 12.03.020, C.

12.03.010 Road Classifications: *County roads or streets are classified functionally as indicated in the following Sections 12.03. Function is the controlling element for classification and shall govern right-of-way, road width and road geometrics. Other given elements such as access, arterial spacing, and average daily traffic count, (ADT) are typical.*

12.03.020, C: Rural Local Access (Class 09). *Road, which provides direct access to adjoining properties within a neighborhood. These constitute all rural mileage not classified as principal arterial, minor arterial, major collector, or minor collector mileage.*

4. Road Design Standard: Per current Kittitas County Road Standards Table 4-2:
- a. Road shall be constructed to a total paved width of 26' with a minimum of 22' traveled way.
 - b. Access shall be constructed within a 60' wide right-of-way dedicated to the public.
5. Road Plans: Developers shall submit road plans as follows: Plan and profile drawings for all roads shall be submitted to the county engineer on film or linen sheets twenty-two inches by thirty-six inches in size, and receive his approval before proceeding with construction. The drawing standards used in preparing the drawings shall conform to the current drawing standards employed by the department of public works. All plans for roads, drainage, and utility construction are to be designed and prepared by a licensed professional engineer. Staking for road construction and adequate survey control for utility construction shall be provided at the subdivider's expense. **No work may be started until such plans are approved.** (see current Kittitas County Road Standards 12.08.010 for more detailed information).
6. Construction Control and Inspection: Work performed in the construction or improvement of county roads, future county roads, whether by or for a private developer, by county forces, by county contractor or by private contractor, shall be done in accordance with standards and approved plans (Section 12.08). Inspections shall take place during the following construction stages:
- a. Clearing and grubbing;
 - b. Road system drainage;

- c. Road subgrade;
 - d. Road ballast grade;
 - e. Completion of road surfacing.
 - f. The plat shall pay all costs involved in said inspection services. The plat bond will not be released or the final plat approved until inspection costs are paid in full.
 - g. It shall be the responsibility of the developer to notify the public works director in advance of the required inspections. All materials used and all work performed must be to the satisfaction of the public works director prior to acceptance by the county.
7. Testing and Timing of Construction: The provisions of Section 2-03 of the WSDOT Standard Specifications apply in all respects to development construction unless otherwise instructed by the Director prior to construction, the subdivider's engineer shall provide certified test reports for gravel base, Class "B" and crushed surfacing top course from a reputable testing firm for approval. (Also see current Kittitas County Road Standards Chapter 9 for more detailed information).
- a. Upon gaining the Director Of Public Work's approval of the road and utility plans and the Board Of County Commissioners approval to proceed with the final plat, the subdivider may request the director of public works to call for a preconstruction conference in accordance with subsection (d) of this section and proceed with construction of the utilities and roads or file an approved bond.
 - b. Subdivider shall select his contractor to undertake the road construction. The contractor shall be capable of supplying the minimum equipment specified. The subdivider shall notify the director of public works of his selection and the director shall in turn call a preconstruction conference, at which conference, staking, construction details, coordination with utilities, county inspection, and time schedule will be discussed and decided upon such as to assure meeting the approved plans and time for completion. Those expected to attend the conference include:
 - 1. Subdivider, his engineer and contractor;
 - 2. Representative of all involved utilities;
 - 3. County director of public works or his representative.

- c. Following successful completion of the preconstruction conference, utility and road construction may proceed.
 - d. Once final road plans have been approved and the preconstruction conference has been held, road construction inspection costs incurred by Kittitas County shall be charged to the developer on a reimbursable basis. The costs shall be paid prior to final acceptance of the road.
9. **Bonding:** The developer shall submit a bond to the Department of Public Works (See current Kittitas County Road Standards 12.01.150). Failure to comply with these Standards may result in denial of plan or development permit approval, revocation of prior approvals, or legal action for forfeiture of performance guarantee.

- a. **CONSTRUCTION PERFORMANCE GUARANTEES:** In lieu of the completion of any required improvements prior to approval of a final plat, short plat or other land-use action, the developer shall provide a performance guarantee in an amount and with satisfactory surety and conditions providing for and securing to Kittitas County the actual design, construction and installation of such improvements within a period specified by the Director. The Director will enforce the guarantee through appropriate legal and equitable remedies. If a surety bond is provided for public or private roads, the amount of the bond shall equal one hundred and thirty-five (135%) of the estimated design and construction cost. When a letter of escrow or cash is used, which will be acceptable only for public roads, the amount covered shall be for one hundred fifteen percent (115%) of the estimated construction cost as reviewed and concurred by the Public Works Director

The amount of the financial guarantee may be reduced during construction proportionally to the amount of work completed, as said work is approved by the Public Works Director.

Building Permits will not be issued until road construction is completed or bonded to the subject dwelling or structure and approved by the County or a licensed professional engineer. The developer is legally and financially responsible for ensuring all roads are constructed in accordance with this code.

- b. **MAINTENANCE PERFORMANCE GUARANTEES:** The successful performance of public improvements shall be guaranteed for a period of not less than two years from the date of acceptance or Final Construction Approval (which ever is last). The amount of the maintenance guarantee shall be ten percent (10%) of the construction

cost and the form of the maintenance financial guarantee shall be approved by the Public Works Director. Maintenance guarantees will not be required when the required performance guarantee is \$1,000.00 or less. (Ord. 2005-30, 2005)

10. Storm Water: Developer shall provide a storm water plan for surface water flows entering, flowing within and leaving the subject property. The plan is to conform to the following standards and requirements (see current Kittitas County Road Standards 12.06.050):
- a. The Kittitas County Director Of Public Works may require plans for storm drainage and detention facilities to be prepared by a registered civil engineer currently licensed by the state of Washington and qualified by experience and education in the field of hydraulics, hydrology, or a closely related field. Storm water plans or revisions to any approved plan shall be reviewed and approved by the public works department prior to any construction.
 - b. On-site storm water improvements must be sufficient to mitigate impacts due to flooding, erosion, sedimentation or pollution.
 - c. All drainage system elements must provide for adequate maintenance and accessibility at all times. Storm water facilities shall be designed to eliminate interference from underground utilities and from conditions, which exceed design loads for any pipe or other structural element.
 - d. The designer of any storm water element shall consider system reliability in terms of layout, specifications of materials and methods of installation.
 - e. The impact of a system failure should be analyzed both in terms of on-site and off-site effects. The impacts may be to adjacent properties or to elements of the public drainage system or other private systems.
 - f. No drainage originating inside of a building or structure shall be connected to the storm water or surface water systems.
 - g. Developer shall meet all other applicable laws for water quality prior to discharge to any wetland, stream, or lake.
 - h. Developers are encouraged to be innovative and give high priority to fish, wildlife, plant materials and related total resource management systems.

11. Approaches: All approaches to county roads shall be constructed as follows:
 - a. An approved access permit will be required from the Department of Public Works, prior to creating any new driveway access, or performing any work within the county road right-of-way.
 - b. Maintenance of driveway approaches shall be the responsibility of the owner(s) whose property they serve. Kittitas County will not maintain accesses.
12. Roadside Features: Mailboxes must be approved by U.S. Postal Service. Mailbox locations are site specific. Contact your local Post Office for location and design standards before beginning construction
13. Addressing: Contact the Kittitas County Rural Addressing Coordinator at (509) 962-7523 to obtain addresses prior to obtaining a building permit. A parcel cannot receive a building permit or utilities until such parcel is identified with a 911 address.
14. Fire Protection: Contact the Kittitas County Fire Marshall regarding any additional access requirements for emergency response.
15. Irrigation Water: Irrigation water will need to comply with irrigation District requirements and continued in front of and through the site to any downstream users. No irrigation water or tail water will be conveyed in the county right of way along the projects county road frontage.
16. Wellhead Buffers: Wellhead Buffers will not encroach within County Maintained R/W.
17. Swales: Public Works suggests the construction of swales vs. hard ditching for this development.

In addition to the above-mentioned conditions, all applicable Kittitas County Road Standards apply to this proposal.

Please let me know if you have any questions or need further information. In addition, Public Works would request supplemental information regarding this matter as such information is relayed to the Planning Commission, Board of Adjustment or additionally involved entities.

Notice of SEPA Action
Mt. Baldy Short Plat (SP-08-00022)

NOTICE IS HEREBY given that pursuant to 43.21C RCW (SEPA), Kittitas County Community Development Services did, on October 28, 2008, issue a Mitigated Determination of Nonsignificance (MDNS) for an application from Chris Cruse of Cruse & Associates, authorized agent for MDJ Development, landowner, for a 4 lot Short Plat pursuant to Kittitas County Code 16.32 on approximately 4.39 acres of land that is zoned Rural Residential (Suburban). The subject property is located east of the City of Ellensburg, west of Number 6 Road, south of Quartz Mountain Drive on Mt. Baldy Lane, Ellensburg, WA 98926, and is located in a portion of Section 06, T17N, R19E, WM, in Kittitas County. Assessor's map number 17-19-06094-0009.

Any action to set aside, enjoin, review, or otherwise challenge such administrative SEPA action on the grounds of noncompliance with the provisions of chapter 43.21RCW shall be commenced **on or before November 12, 2008 at 5:00 p.m.** to the Kittitas County Board of Commissioners, Rm. 108, County Courthouse, Ellensburg, WA. 98926. The complete application file may be viewed at Kittitas County Community Development Services, 411 N. Ruby St. Suite 2, Ellensburg, WA 98926, or on the CDS website at <http://www.co.kittitas.wa.us/cds/current>. Staff Planner: Trudie Pettit.
