Re: SP-12-00006

Dear Mr. Watson:

Thank you for the opportunity to comment on the short subdivision of approximately 10 acres into 2 lots, proposed by David O'Keefe. We have reviewed the application and have the following comments.

WATER QUALITY

Dividing or platting of a piece of property is often the first step in a proposed development. An NPDES Construction Stormwater Permit may be required if a subsequent individual or common plan of development that has potential for stormwater discharge from a construction site with disturbed ground. Ground disturbance includes all utility placements and building or upgrading existing roads. The process requires going through SEPA, developing a stormwater pollution prevention plan, submitting an application and a 30 day public notice process. This may take 45-60 days. A permit and a stormwater plan are required prior to beginning ground-breaking activities. Please contact **Bryan Neet** with the Department of Ecology, (509) 575- 2808, with questions about this permit.

WATER RESOURCES

In Washington State, prospective water users must obtain authorization from the Department of Ecology before diverting surface water or withdrawing ground water, with one exception. Ground water withdrawals of up to 5,000 gallons per day used for single or group domestic supply, industrial purposes, stock watering or for the irrigation of up to one-half acre of lawn and garden are exempt from the permitting process. Water use under the RCW 90.44.050 exemption establishes a water right that is subject to the same

privileges, restrictions, laws and regulations as a water right permit or certificate obtained directly from Ecology.

On March 28, 2002 the Washington State Supreme Court ruled that the RCW 90.44.050 permit exemption does not apply where a developer of a residential subdivision proposes multiple wells to serve each lot in the development because in combination, the withdrawal will exceed the exemption criteria.

All water wells constructed shall be in accordance with the provisions of Chapter 173-160 WAC by a driller licensed in the State of Washington. All wells must be located a minimum of 100 feet from any known, suspected, or potential source of contamination and shall not be located within 1,000 feet of the property boundary of solid waste landfills. A well report must be submitted to the Department of Ecology within thirty days after the completion of a well.

If you have any questions or would like to respond to these Water Resources comments, please contact **Mark Dunbar** at (509) 575-2024.

Sincerely,

Gwen Clear
