**Subject: Kittitas County Public Works; Fairview Road Safety and Culvert Replacement Project
Request for SEPA Review**

Dear Lindsey:

Kittitas County Public Works needs to replace three deficient culverts that convey Coleman Creek under Fairview Road. The roadway in this section is also below current safety standards for width and will be widened as part of this project. The project will be completed with local funds only, with no federal funding.

On behalf of Kittitas County Public Works, Jacobs is submitting the attached SEPA Checklist for your use and review. The Checklist has been signed by Mark Cook, Director of Public Works.

Also enclosed is the Joint Aquatic Resource Permit Application Package that was sent to Department of Ecology, WDFW, and the Corps of Engineers. A Floodplain Development Permit is required. Public Works will apply for and issue this permit in the next week. A copy will be delivered for your use.

Sincerely,

Craig Broadhead
Inland NW Environmental Group Lead
Jacobs Engineering Group
