

8/21/20

To whom it may concern -

We are very upset that we were not notified as to what was happening just up the street from us. I don't know about you but I certainly don't want to drink or smell shit in my well water + air when the wind comes from the North + West and we live down wind from your proposed shit pond - We also have an Aquafise that comes down Parke Creek just North of it, not only does this affect us but the whole Valley. We have Parke Creek running through our property we live less than 1/2 a mile from this shit pond. Plus KRD irrigation water is next door to us and it would also be contaminated and spread thru the whole Valley and back into the Yakima River. There is a bays home next door to the shit pond, how would you feel if one of yours ~~was~~ ^{was} at this place. Also when we built our home we had to jump thru hoops to get our Septic system put in and now you give Brown + Jackson free rein to dump over 100,000 gallons of shit daily and stay its no big thing, how would you like to live next door to it - Also building a bridge

across Parke Creek we were told is
illege. Needless to say upset doesn't
discribe the neighbors outlook on this
project.
