Re: Brown and Jackson  
Project SE-20-00003

We are writing to voice our opposition to the Brown and Jackson project SE 20-00003.

Living less than one mile west of the proposed site, we are concerned with the odor that we will have to smell from sewage being dumped there. The prevailing winds that we get in the winter time are from the southeast. We could smell the former silage pit on the Vantage highway when the winds blow this direction and that is four miles away from our location.

We are also concerned with potential water quality contamination issues due to prolonged use of this land for a septage storage facility.

Lastly, we are concerned with the increase in traffic this could cause to a rural neighborhood. If other companies are paying to dump waste at this site, there will be an increase in large truck traffic and traffic noise, turning a rural neighborhood into an industrial area, which it is not zoned to be.

Please share our written concerns to the appropriate person(s) and committee(s)

Sincerely,

Rodney and Janielle Paul
