To follow up on this, there are streams on both the western and eastern ends of this property. Their site plan would need to be set back from these streams per the CAO requirements. The stream on the western edge is a Ns stream, non-fish bearing seasonal stream and on the eastern end is a disconnected portion of the North Fork Teanaway river and associated shoreline area.

Kelly,

There are critical areas on our near the property, but the application does not show a site plan. Can you please upload the site plan so we can evaluate if the site plan is consistent with the critical areas on or around the property?

Thanks,

Scott
