Cary,

I had the chance to go out and look at your **parcel # 641634** at 10:30 on 7/1/2022 (today).

I confirmed that there are **no regulatory watercourses on your parcel**. I did notice some depressional areas which will likely capture water via snowmelt in the winter months, but these are not regulatory and do not qualify as streams.

You may use this email when corresponding with the county to confirm absence of the stream. They can contact me if there are any further questions.

Thanks,

Elizabeth
