Kittitas County Public Health Department Air Quality Advisory Committee Meeting Minutes

Friday July 11, 2014

In attendance:  Sue Billings, Camille Bennett, Holly Myers, Jake Armstrong, Roger Parker, Roylene Crawford, Anne Johansen, Amy Fuller, Erin Moore, Josh Hink

Amy Fuller reviewed the preliminary survey results for the Air Quality community survey. She reviewed that the next steps would be:

• Finish collecting Spanish surveys (goal 50)
• Analyze Qualitative data
• Write up the official interpretive report
• Generate outreach materials based on survey results

There was discussion about the survey results. The group had some suggestions about how to analyze the data:

• Break out survey results by in city limits/out of city limits
• Break out survey results by online/written results

The group also talked about some follow up survey questions, which would drill deeper into burning habits (ie: volume, type, etc.)

Sue Billings suggested that we distribute the survey results to multiple analysts and then to multiple interpreters to get the most comprehensive view of this survey.

The committee also discussed the education piece that would be one of the next steps in the overall goals of the committee. The topics that will be highlighted in the education piece will be determined once the data has been interpreted, but the group conversed about different avenues for education and incentives that may be part of the education program.

The next AQAC meeting will be held Wednesday August 15th, 2014 at 10:00 in the Morris Sorenson conference room.
