Caribou Road Hard Surface Project

Location:
Caribou Road is located east of Ellensburg and northeast of the City of Kittitas in rural ranching and farming land. The gravel surfaced segment of Caribou runs from Clerf Road on the south to Vantage Highway on the north. The section is 1.10 miles in length.

Project Description:
Chip seal was applied to this section of Caribou Road to create the hard surface.

Funding:
County road funds were used for this project.

Schedule:
2 shots of oil and chips were applied to Caribou Road on July 25th and additional chip seal material was applied at the end of August, 2013 to complete the hard surfacing.

Road History

Updated 10/4/2013
Caribou Road was originally established as Jesse Poland Road, or the Poland-Bailes Road, named after original land owners in the area. It was then part of the original Cooke Canyon Road, and then this gravel section was called the South Caribou Road.
