## Service Proposal

Number NPSQ13591-01

Date Aug 23, 2016

### Proposal Details

#### Full Emergency Service

Emergency Service and Preventive Maintenance Program includes:

- \* 7x24 Emergency Service
- \* Four (4) hour or less response time
- \* Full Service Coverage (except replacement batteries & full-string capacitors)
- \* Preventive Maintenance

Note: Full Service coverage includes 100% parts, labor, travel, and on-site time for both remedial and emergency repairs, with the exception of battery and full-string capacitor replacements. Service agreement does not cover replacement batteries or full-string capacitors (individual failed capacitors are covered under the terms of this agreement). Any service found to be related to these items, will be billed separately.

Multi-year contracts lock in pricing for the duration of the contract term (price increases due to material and/or labor cost increase are avoided). Multiple year contracts can be canceled at any time by purchaser with 30 day written notice, the unused portion of the contract term is then refunded to purchaser.

## Uninterruptible Power Supply (UPS) Preventive Maintenance Scope of Work

### Semi-Annual (Minor) Inspection

1. Review customer UPS maintenance logs and make entries into customer logs.
2. Review alarm history and operation of the system with customer.
3. Review environmental conditions and room cleanliness with customer.
4. Record as found conditions.
5. Perform thermal scan and visual inspection of all breakers, power connections, wiring harnesses, contactors, cables, fans, and major components.
6. Clean/replace air filters as needed.
7. Record input, output, battery voltages, currents, and frequency from display/meter panel.
8. Measure and record input/output, battery voltages, currents, and frequency.
  - a. Calibrate display/meters as necessary, where possible.
9. Calculate and record load percentage.
10. Verify proper float and equalize settings for installed battery plant.
11. Inspect general overall condition of battery plant.
12. Measure and record harmonic trap filter currents where possible.
13. Review/implement manufacturer field change notices, as possible.
14. With customer's approval (after confirming system battery is good) perform system functionality test and confirm proper operation.
  - a. Full testing includes customer bringing generator on line if one exists.
15. Verify proper operation of remote status panel and monitoring.
16. Record as left condition, discuss findings with customer and provide field service report.

### Annual (Major) Inspection – Continued From Above

17. Obtain customer authorization to transfer system to bypass.
18. Transfer system to bypass and secure critical load.
19. Utilize external maintenance bypass system if present.
20. Inspect inverter and rectifier snubber circuits, gate drives, and discrete components for discoloration or damage.
21. Inspect all power connections, breakers, contactors, transformers, and subassemblies for discoloration or damage.
22. Inspect all AC and DC capacitors for leakage/bulging.
  - a. Record date codes, part numbers, and quantities.
23. Inspect all fans and record date code, part numbers, and quantities.
24. Inspect all logic boards, assemblies, and connections and clean as necessary.
25. Clean and vacuum interior and exterior of system.
26. Measure, record, and calibrate power supplies where possible.
27. Verify and calibrate system alignments to factory specifications where possible.

NOTE 1: Inspection tasks may not apply to all makes and models.

NOTE 2: Corrective/Predictive Maintenance, not covered by the terms of the Service Contract, will be billed at current Time & Material rates.

NOTE 3: Scope of Work may be generic and subject to change to accurately reflect equipment on site.

## Sealed (VRLA) Battery Service Preventive Maintenance Scope of Work

### Semi-Annual (Minor/Quarterly) Inspection

1. Review Customer battery maintenance logs and make entries into customer logs.
2. Safety Inspections
  - a. Warning/hazard labels.
  - b. Operational information and placards.
  - c. Eye wash and deluge shower (if applicable).
  - d. Goggles, gloves and apron (if applicable).
  - e. Terminal covers (if applicable).
  - f. Spill containment (if applicable).
3. Measure and record:
  - a. Ambient room temperature.
  - b. DC voltage and current for each string.
  - c. AC voltage and current for each string.
  - d. DC voltage of each cell/jar.
  - e. AC millivolts of each cell/jar.
4. Inspect jar, cover, and rack/cabinet for signs of leakage.
  - a. Clean as necessary.
5. Inspect terminal posts, connectors, and cables for corrosion.
  - a. Clean as necessary.
6. Inspect general appearance and cleanliness of battery room.
  - a. Clean as necessary.

### Annual (Major) Inspection – Continued From Above

7. Record load test/ohmic measurements on each cell/jar, if accessible.
8. Measure and record inter-cell terminal and cable connections, if accessible.
9. Re-torque inter-cell/jar and inter-tier terminal connections as necessary, if accessible.
10. Clean and neutralize jar, cover, and rack/cabinet as necessary.
11. Record as left condition, discuss findings with customer and provide field service report.

NOTE 1: PM pricing is based on standard string configuration. Upon inspection, should the number of batteries or strings change, pricing will be adjusted accordingly.

NOTE 2: Corrective/Preventive Maintenance, not covered by the terms of the Service Contract, will be billed at current Time & Material rates.

NOTE 3: Scope of Work may be generic and subject to change to accurately reflect equipment on site.

NOTE 4: Maintenance performed in accordance with IEEE and OEM standards.

## Battery Proposal

Number NPSQ16686-01

Date Sep 15, 2016

### Proposal Details

#### Batteries

- \* Lead time on batteries subject to availability.
- \* This quote does NOT include the cost to have the OEM on site to reset the battery life timer if applicable. If you require this service, please contact your sales representative for an updated quote.
- \* Warranty applies to raw battery only (Freight and installation not included.)
- \* Proposal is based upon normal hours installation (Monday-Friday, 8am-5pm). To request pricing for non-standard installation hours, please contact your sales representative.
- \* Freight is not included and will be billed as a separate line item on the invoice. If freight needs to be included on the PO, please request a freight estimate.
- \* Quoted price includes Nationwide Power recycling all spent battery cores. If client chooses to keep any spent battery cores, pricing will need to be re-quoted to exclude core credit.
- \* Unless otherwise indicated, all labor charges included in this Battery Proposal require that upon arrival of the Nationwide Power technician(s), the replacement batteries are safely accessible and located on the same level (no stair access required) within 50 feet of the installation location.
- \* Should Nationwide Power be required to move batteries in excess of 50 feet, or up or down stairs, an additional charge will be applied. In the event the installation is delayed or rescheduled, additional labor and return visit charges may also apply.
- \* To ensure additional scope of work requirements are accurately identified and quoted and to minimize delivery problems, the Nationwide Power "delivery instruction form" MUST be submitted prior to order processing. This will assist you in identifying and communicating any additional or non-standard site conditions, or battery location and installation requirements. You can find this form attached with the quote or via our website [www.nationwidepower.com/deliveryform](http://www.nationwidepower.com/deliveryform)

Please note: for safety reasons, all areas leading to and around the UPS System must be clear of debris and obstructions, in order for our technicians to safely transport and replace the batteries. If walkways and area cannot be cleared due to equipment, wiring, and/or other obstructions, we ask that you offer assistance in getting the batteries to/from the UPS system. This helps prevent injury to our technicians, as well as damage to the batteries, your site, and equipment.
