DATE: 11/7/05

COMMISSIONERS PRESENT: Chairman Perry Huston, Vice Chairman David Bowen, Commissioner Alan Crankovich

CDS STAFF PRESENT: Director Darryl Piercy, Administrative Assistant Mandy Weed, Long Range Planner Jan Sharar

OTHERS PRESENT: Nancy Goodloe

TOPIC:
1. Comp Plan Update
2. Meeting with Homebuilders
3. Fire Investigation Safety Gear
4. Other

DISCUSSION:
1. Piercy stated that we now have a draft of the public meetings scheduled as a follow up to the scope of work. He also stated that if the Tribune had contacted us we could have explained how we were planning on dealing with the problems they brought up. Piercy said that we are looking at specific topics for meetings. Sharar went over the work proposal (see handouts) and she also stated that we have only received 7 applications for the Advisory Committee. Sharar stated that she hopes to have the first four meetings wrapped up before she leaves in December. Piercy stated that we also hope to have a virtual library on our website. Commissioner Huston said to be sure not to just bunch the meetings up so we can’t staff them and don’t double up on the meetings and that we can purpose Comp Plan Amendments on a yearly basis if we want to.

2. Piercy stated that he is having a meeting on Thursday at 4:30 pm with the local homebuilders to try and get everyone on the same page. He stated that are looking at consistency so that all of the inspectors are looking at the same things and Piercy just wants to close that loop with the homebuilders and go over their questions and let them know how things will be handled started the beginning of the year including that site code. He also stated that he wants to inform them that the better information we have from the beginning the less time it will take for us to review their plans. Piercy also stated that he is very pleased with all of the inspectors.

3. Piercy stated that he wanted to see what the Commissioners thought about of Fire Investigation Safety gear. Piercy stated that it would be good to have safety goggles, hardhats and a marked jacket. Commissioner Huston said that it is more important to have policies and procedures that go along with it as to how and when to use the gear.
Commissioner Huston said to fine tune the policy and put together a training policy and then buy the equipment.

4. Piercy stated that he will be attending a fire chiefs meeting if any of the BOCC is interested in going as well. It is November 17, 2005 at 7:00 pm at the Cle Elum Fire Station. Commission Bowen said that he will also attend the meeting.
