Re: BL-22-00029 Sparks

Regarding the above notice of application, the KCFMO does not see why this boundary line adjustment would decrease or increase any hazards that are already associated with both parcels mentioned in the narrative. The KCFMO also does not see how this boundary line adjustment would increase or decrease the capabilities of any emergency response agencies, local, state, federal, or other, to respond, access, or otherwise effectively operate an emergency on or near either of the parcels mentioned in the narrative. The KCFMO sees no issue(s) with approving this application so long as the above-mentioned capabilities remain intact at their current level of effectiveness and ease or better.

Thank you for your time.

Deputy Fire Marshal,
Joseph A Dietzel
