RE: CU-23-0001 3 BR Customer Cuts – Revised Application

I am, once again, writing to in favor of the proposed meat processing plant. Even though I am not a neighbor or even live close to the proposed site, I have done the research in to this project, mainly because of the social media posts. By doing so, I feel correctly informed with facts that this facility will not be a burden on the neighbors. This new proposal looks even better than the 1st one, and keeps all of the activity under one roof.

My hope is that others have done the same and understand that this site will not be a feed lot situation, only daily temporary holding pens, and will all be indoors, in a clean and USDA regulated facility.

This valley is still in need of such a facility, other places are booked months in advance. Plus, people are having to leave the valley to have their home-grown meat or hunted game processed. Let's keep the money in the valley.

My hope is that this facility will be approved. May I remind others that this is a USDA regulated facility, that will make sure that our food products stay clean and germ free.

Thank you for taking my letter.
