We are extremely concerned that adequate studies have not been done to illuminate the actual impacts this project will have on the surrounding environment and community.

We respectfully request 1) clarification and documentation around the specific **SEPA / environmental policy** issues in the application and (2) a second round of comments once the information is made available. These areas include:

- no permit from the department of ecology to use groundwater
- lack of specificity about groundwater sources
- lack of specificity in water runoff impact
- no traffic plan
- no examination of wetlands impact
- no consideration of threatened species
- no data on impact of noise

Respectfully,

Ed and Kathy Kratzer
